

### Natural gas is king in the kitchen.

There's something magical about cooking with gas. Instant, precise heat and the ability to adjust temperatures almost immediately makes stove-top cooking a breeze.

### Get hot and steamy with gas water heating.

You're on a winner with natural gas water heaters. Water heats quickly and efficiently, which is important when you consider that hot water accounts for a large portion of household energy consumption.

Why you'll love  
the benefits of  
natural gas.

## Why natural gas is a natural choice for your home.

Thinking about connecting to natural gas? You have good reason – natural gas has a lot going for it. To begin with, it's one of the more efficient energy sources you could have in your home. Natural gas is an environmentally-friendly choice, too. And, of course, it's hard to beat for versatility and convenience.

## Feel warm all over with natural gas heating.

No waiting for electric elements to warm up, or messing around with newspaper and kindling. Natural gas heating is instant, and highly controllable. There's a remarkable range of flued or freestanding gas heaters to choose from. You can even recapture the romance of the traditional fireplace with a real flame gas log fire.

## How to connect with a minimum of fuss.

If you're ready to get the gas on, just have a word to your appliance retailer. They'll let you know whether gas is available in your street. If so, they can arrange the entire connection process – through Genesis Energy's specialist new connections team.

Your appliance retailer will simply ask you for a few details to fill out a connection form. From here, Genesis Energy will contact you to let you know how long a connection will take in your area, and to set up an account. They'll then organise to have your gas meter installed and connected.

## It really is that easy.

Now you can get straight back to the fun bit – choosing your new gas appliances. Don't forget, your gas appliance retailer may also be able to arrange a qualified gas fitter to install your new appliances.

All that's left to do is, well, sit back and enjoy the benefits of natural gas.

## You'll be right at home with Genesis Energy natural gas.

While natural gas will undoubtedly enhance your everyday living, Genesis Energy is here to improve your total experience – with a whole range of added benefits.

### Competitive pricing plans.

Naturally, Genesis Energy works hard to keep prices competitive. But that's only half the story. You can also choose from a range of plans to ensure you're getting the best value for money.

### Would one bill for gas and electricity make things easier?

When you're with Genesis Energy for both gas and electricity, you can roll everything into one easy bill, saving you time, hassle and paperwork.

### How about 10% off your gas bill?

We all like to save money when we can. With Genesis Energy's 10% prompt payment discount, it's as simple as paying your bill in full and by the due date.

### Plenty of ways to pay.

Genesis Energy even makes paying bills more convenient. Choose from direct debit, automatic payment, telephone transfer, Internet banking, EvenPay Direct, Freepost, over the counter and credit card.
